**Directions:** Answer the question; the suggested time is about 22 minutes for answering this question. Write all your answers on the lines following the question and not on a separate piece of paper. Where calculations are required, clearly show how you arrived at your answer. Where explanation or discussion is required, support your answers with relevant information and/or specific examples.

The development of plans for long-term resource management depends on understanding the patterns and consequences of resource use.

- (a) Describe what makes a resource renewable or nonrenewable. Give a specific example of a renewable resource and of a nonrenewable resource.
- (b) Describe and compare total resource use per capita in developed and developing countries.
- (c) What is meant by sustainable resource use? Give an example.
- (d) Economic policies and practices affect society’s progress toward achieving sustainable resource use. Discuss one policy or practice that facilitates this progress, and one that impedes it.
